EASY TO USE

UNIQUE 2-PART BREW SYSTEM

COMPOST TEA

0.92 - 0.19 - 1

DIRECTIONS FOR USE

PREP:

1. BEFORE USE MAKE SURE YOUR
2. Fill brewer with fresh, filtered water.

Osmosis system to remove any chlorine and chloramines from water supply. Maintaining water temperatures between 60 - 70° F (16 - 21° C) throughout the brewing process is ideal.

COMPOST TEA BREWER IS CLEAN!

We recommend using a Hydrologic Reverse

APPLICATION:

Place nylon Tea Brews Pouch in water intact, tear open Plant Microbe Food Pack and add contents.

3 - 5 gal water: 1-80g Tea Brews Pouch + contents of 1 Plant Microbe Food Pack.

15 gal water: 3 - 80g Tea Brews Pouches + contents of 3 Plant Microbe Food Packs.

Keep solution well oxygenated and allow to brew for 48 hrs.

Only a portion of the nutrients contained in the Tea Brews Pouch 0.92-0.19 - 1 will be transferred to the compost tea. To increase utilization of the nutrients, you may apply the contents of the pouch to the application area.

QUICK BREW:

In bucket with 3-5 gal of water; add 1 - 80g Tea Brews Pouch intact. Squeeze and rapidly massage Tea Brews Pouch for 60-90 seconds, helping to seep material into water. Waterproof gloves recommended when handling all material in water. Add contents of 1 Plant Microbe Food Pack and stir solution until well mixed. Apply immediately.

APPLY:

Pour tea (standard brew or quick brew) full strength around the base of each plant weekly. Follow with a thorough watering.

Rate: 1 - 3 gal container: 1 - 2 cups

5 - 7 gal container: 3 - 4 cups

10 - 20 gal container: 5 - 8 cups

Five gallon brew, undiluted, will cover 26 sq. ft. @ 3 cups/sq. ft.

Diluted (1:10) will cover 266 sq. ft. @ 3 cups/sq. ft.

25 - 50 gal container: 1/2 gal - 1 gal

100 gal container: 2 - 3 gal

Old Truck Organics Compost Tea may be diluted. Max dilution 1:10 (1 gal tea for every 10 gal of water)

HYDROPONIC SYSTEMS:

Use tea 24 hours before changing reservoir. Running tea in a hydroponic system for prolonged periods is not recommended. Add brewed tea at the rate of 1 - 2 gal for every 10 gal of nutrient solution. Use tea weekly throughout growing season including the final week prior to harvest.

CLEANING TEA BREWER:

All residue from brewing should be washed off and the brewer should be disinfected. Use antibacterial soap, bleach (2%) or hydrogen peroxide. Rinse brewer thoroughly after disinfecting.
